DHJ Services, LLC Recognized as a Key Technical Assistance Provider for Rural, Tribal, and Indian Health Services under California's CalAIM Initiative

New Haven, CT – DHJ Services, a national healthcare consulting firm, proudly announces its recent designation as a California Providing Access and Transforming Health (PATH) Technical Assistance (TA) Marketplace vendor. Awarded by the California Department of Health Care Services (DHCS), this specialized designation positions DHJ Services as a pivotal resource for eligible organizations and providers seeking state-funded access to expert guidance in navigating the complexities of CalAIM.

With a prominent focus on vulnerable populations, health equity, care management, and managed care, DHJ Services stands prepared to deploy its comprehensive suite of services to support the needs of TA Marketplace patrons. Leveraging unmatched capabilities, the firm aims to foster cross-sector partnerships and make a substantial impact in empowering entities to enhance community health outcomes. The official commencement of DHJ Services' involvement commenced on March 15, 2024.

The TA Marketplace, an established platform catering to county departments, community-based organizations, Medi-Cal Tribal, and Designees of Indian Health Programs, among others, facilitates access to DHJ Services' expertise and resources. This collaboration enables entities to build capacity and enhance effectiveness, all funded by the state.

Dawn Johnson, CEO of DHJ Services, expressed gratitude for the opportunity, stating, "DHJ Services is honored to offer our tailored and trusted services for all seven domains in this marketplace, supporting DHCS' goal of revolutionizing technical assistance access from curated and approved vendors. This opportunity marks a significant stride towards reducing barriers in accessing services for Medi-Cal Tribal and Designees of Indian Health Programs and rurally located entities. We encourage eligible entities to connect with us and plan how best to obtain the benefits of this aspect of CalAIM." This initiative is aligned with PATH's broader mission to strengthen the capacity and infrastructure of on-the-ground partners for successful participation in CalAIM Enhanced Care Management (ECM) and Community Supports (CS) initiatives.

DHJ Services boasts a proven track record in delivering effective technical assistance and supporting community health programs. Notably, in 2021, the firm facilitated the successful expedited contracting process for two Indian Health Service providers, enhancing their ability to qualify for funding mechanisms within CalAIM.

As a certified black woman-owned healthcare consulting firm, DHJ Services distinguishes itself through a commitment to capacity building, fostering sustainable growth, and empowering organizations across diverse sectors.
